WORK EXPERIENCE

Software Developer - Zumi Africa | Jan 2033 - Mar 2023

- During my brief tenure at Zumi, I played a vital role in ensuring smooth operation of their E-Commerce platform, *app.zumi.africa*.
- In addition to addressing occasional bugs, I developed and integrated a new reporting system that streamlined the process of monitoring the business performance.
- Furthermore, I actively participated in customer support and conducted surveys that provided valuable insights, which we leveraged to make informed decisions as a tech team.

Software Developer - Homeland Teq Solutions | Feb 2022 - Jan 2023

- I had the privilege of creating the company website *HomelandTeq.com*, a task that involved my expertise in implementing a responsive and visually appealing website that effectively communicates the company's brand.
- I utilised my UI/UX skills to design and develop a user friendly and intuitive interface for the bulk sms platform *app.ujumbepap.com.*

Software Developer II - Zukabit Solutions | Oct 2020 - Feb 2022

- I collaborated closely with the design team to create a fresh and engaging online presence. I created both both the initial draft, *zukabitfrontend.vercel.app*, and the final version, *zukabit.co.ke*.
- Furthermore, I leveraged my expertise in SEO and keyword research to craft compelling blog articles for the website that drove more traffic to the website.
- I developed a user-friendly dashboard and landing page for w*etrack.co.ke,* allowing users to track their assets live on a map, and generate comprehensive reports.

Chief Design Officer - Lattice Interactive | Mar - Dec 2020

- I was responsible for ensuring all website designs are not only visually appealing, but also meet the unique needs and preferences of each client.
- I worked collaboratively with a small team of developers via GitHub to bring our clients' visions to life.
- Websites Developed – *Theboxcinema.com, Freedom.or.ke, Jijengee.co.ke*.

Frontend Developer Intern - Numeral IOT | Jan - Mar 2020

- Responsible for the revamp of the company website *Numeral.now.sh and m*ade it responsive in various media screens.
- Through close collaboration with the management and design team, I brought the collective vision to life,

RELEVANT PROJECTS

Delivaflix

- Co-founded a startup called Delivaflix with three classmates, leading it as CEO to be nominated for the JKUSA awards' tech innovation of the year.
- Successfully raised funding and managed daily operations, while also serving as the go-to customer service representative for all customer inquiries.

Taste Of Manhattan

- Collaborated on the creation of the restaurant website *tasteofmanhattan.co.ke*, which not only serves as the online menu for the restaurant but also as a seamless ordering system for customers.
- Conducted expert Search Engine Optimization to ensure that the site constantly ranks highly for American cuisine in Nairobi, Kenya. As a result of these efforts, the restaurant now boasts an impressive 4.7 rating on Google!

German Rides Hub

- Designed a progressive web app for the car selling platform *grh.co.ke* using Angular and a Laravel API to interact with it.
- Following extensive keywork research and optimization, the platform has averaged more than 13,000 monthly impressions on Google.

Dennisweru

- To put it all together I designed and developed my personal website. *DennisWeru.co.ke*
